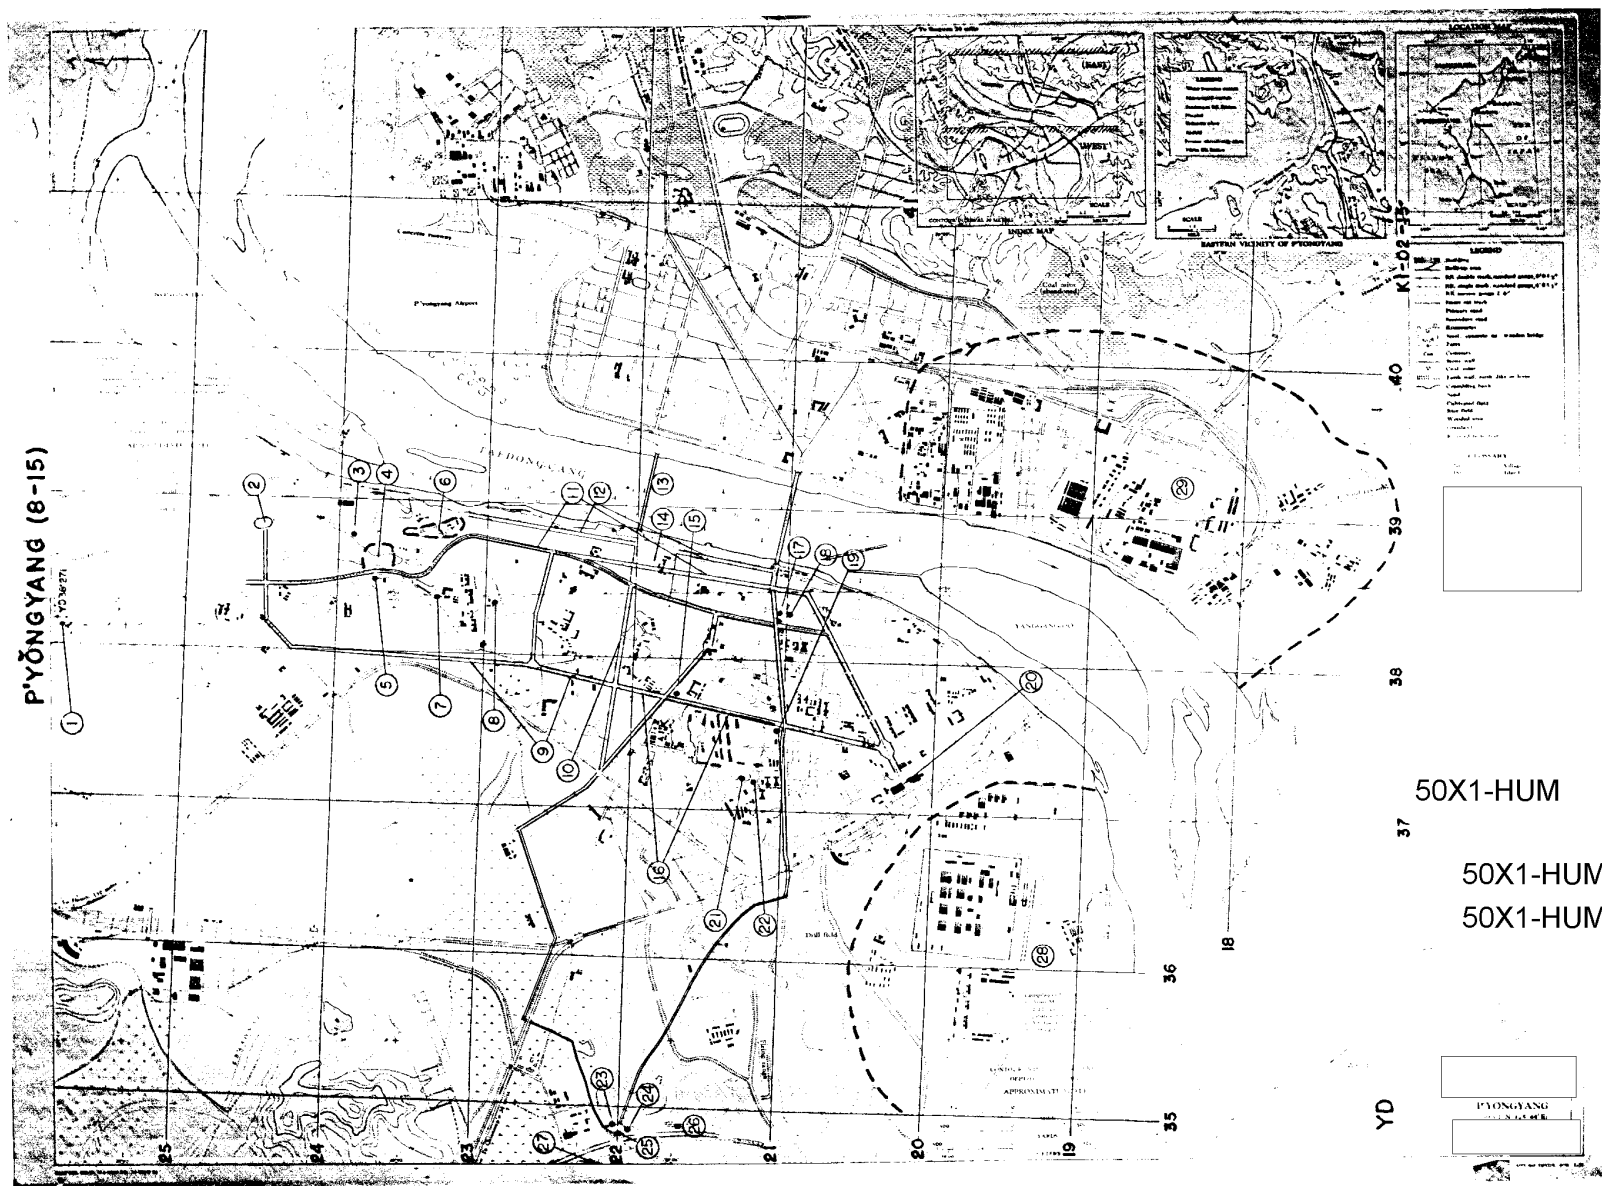

Figure 9: Mao Tse-tung's Street (Mao T'aek-tong Kori)

This road was built in summer of 1954. The road runs straight.

Figure 10: A new road was intended to be constructed in the near future. This road was said to be connected straight from Taedongmun to Pot'ongmun.

Figure 11: Stalin's Street which was completed in July 1954. The former streets which were crooked and narrow bothering in constructing Stalin's Street were removed. So, Stalin's Street is straight. It is as bright as daylight at night because of sufficient illumination along the street.

- [redacted] many modern apartments would be built on the
both sides of this new street as residences of North Korean laborers.
- Figure 13: A highway bridge was said to be newly constructed in the near future.
- Figure 14: KIM IL-sŏng Square 50X1-HUM
- Figure 15: Central Party Committee of the Korean Labor Party. This building is three stories and was built with red bricks during Japanese occupation. This was a primary school during Japanese occupation days.
- Figure 16: People's Armed Forces' Street (Inmŭngun Kŏri)
This was completed in summer of 1954. It runs straight from N to S.
- Figure 17: P'yŏngyang Central Post Bureau. It was a three storied concret building during Japanese occupation, but one more stair was annexed after V-J day.
- Figure 18: This building is occupied by three different organizations, namely P'yŏngyang Central Telegraph Bureau, P'yŏngyang Central Telephone Bureau, and P'yŏngyang Central Suburban Telephone Bureau. It is a four storied concret building. [redacted]
[redacted] the P'yŏngyang Central Railroad Post Bureau was occupying an attached building of this installation. [redacted]

- Note: The communications factories were, accordingly, expected to move in one of the two aforementioned areas in the near future. [redacted] 50X1-HUM

Index to City Plan of Haeju-si:
August 1957

- 1) Working Site, People's Armed Forces, belonging to an unknown unit and installed with two (2) structures without walls, each with measurements of about six (6) meters wide, 15 meters long, and six (6) meters high. These structures, with coal tar coated, wooden roofs, were built in the autumn of 1956 for a number of soldiers engaged in making cement tiles and lumbering.
- 2) West Haeju Railroad Station, a wooden, single story structure with white lime walls and an unknown type of roof, built in 1953 and measuring about 15 meters long, six (6) meters wide, and four (4) meters high.
- 3) West Haeju National Food Factory, two (2) brick, single story structures, approximately 15 meters apart from each other, with red brick walls and red tile roofs, built at an unknown time and measuring about 40 meters long, seven (7) meters wide, and six (6) meters high. This factory produces general types of candy, bean paste and sauce, and other food items.
- 4) Haeju Normal Professional School, built sometime during the Japanese occupation and located in Kuje-dong, Haeju-si. The main building of this school, with two (2) separate ones, each about ten (10) meters long, is a brick, two (2) story structure with gray cement walls and a gray, cement tile roof, measuring about 120 meters long, 13 meters wide, and eight (8) meters high.
- 5) Haeju-si Military Mobilization Department, a wooden, single story structure with white lime walls and a gray, cement tile roof, measuring about 20 meters long, eight (8) meters wide, and five (5) meters high, built immediately following the truce and surrounded by a non-coated, wooden fence, about 1.7 meters high.
- 6) Official Residences 20, built newly at the end of 1955 and belonging to an unknown organization. These residences are brick structures of single story with red brick walls and red tile roofs, each housing four (4) households and measuring about 12 meters long, eight (8) meters wide, and 3.5 meters high.
- 7) Official Residences, Hwanghae-rando Prosecutor's Office, approximately 20 wooden, single story structures, built in the autumn of 1956 newly, with white lime walls and red tile roofs, each housing two (2) households and measuring about 12 meters long, three (3) meters wide, and three (3) meters high.

8. Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0 with cement walls and a gray cement tile roof, measuring about ten (10) meters long, ten (10) meters wide, and four (4) meters high.

- 9) Two (2) School Buildings in combined use by an unknown girls' senior middle school and an unknown primary school. One of them, located on the western side, is a brick, two (2) story structure with red brick walls and a red tile roof, measuring about 50 meters long, eight (8) meters wide and eight (8) meters high, the other on the east side a structure of the same type measuring about 80 meters long, eight (8) meters wide, and eight (8) meters high. The site was formerly used by the Suyang Girls' Junior Middle School, where the above two buildings with a playground about 100 meters long and 90 meters wide to the south were newly built following the truce. The former school building had been utterly destroyed during the war.
- 10) Hwanghae-namdo Court, a brick, single story structure, built sometime during the Japanese occupation and surrounded by a non-coated, wooden fence about 1.7 meters high and 230 meters long, with gray cement walls and a uniform slate roof, measuring about 25 meters long, 20 meters wide, and five (5) meters high.
- 11) Haeju-si Prosecutor's Office, two (2) structures, one, located on the north side and built during the Japanese occupation, of brick and two (2) stories with red brick walls and a gray cement tile roof, measuring about 18 meters long, 18 meters wide, and nine (9) meters high, the other, located on the south side and newly built following the truce, of brick, single story with brick walls and a gray cement tile roof, measuring about 23 meters long, seven (7) meters wide, and four (4) meters high, both surrounded by an about 1.7 meter high fence of wood or brick.
- 12) Hwanghae-namdo People's Committee, two (2) buildings, one on the north side, is a two (2) sided, brick structure, built sometime during the Japanese occupation and repaired of its war damages immediately following the truce, of two (2) stories with gray cement walls and a flat, cement concrete roof, measuring about 100 meters long, 12 meters wide, and nine (9) meters high, the other on the south side is a brick, single story structure, built right after the truce, with red brick walls and a cement tile roof measuring about 15 meters long, five (5) meters wide, and four (4) meters high, both surrounded by a cement fence with measurements of two (2) meters in height, 20 centimeters in width, and 300 meters in length.
- 13) Construction Project belonging to an unknown organization. As of early August 1957, its foundation was completed, measuring about 100 meters long and 80 meters wide. The project site was surrounded by a non-coated wooden fence about two (2) meters high.

- 14 Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0
presumably the Haeju-si Communications Department. This is a two (2) story, brick structure, initially built as a single story structure immediately following the truce and later enlarged to two (2) stories in April 1957, with gray cement walls and a black tin roof, measuring about 35 meters long, 20 meters wide, and eight (8) meters high and surrounded by a black, wooden fence.
- 15) Haeju-si Korean Soviet Cultural Association, a brick, single story structure, newly built in 1955, with gray cement walls and a gray cement tile roof, measuring about 20 meters long, ten (10) meters wide, and 3.5 meters high. Pictorial displays are occasionally held here.
- 16) National Rubber Factory, a brick, single story structure, located in Kuje-dong, Haeju-si, with red brick walls and a red tile roof, measuring about 40 meters long, seven (7) meters wide, and five (5) meters high.
- 17) Hwanghae-namdo Communications Management Office, a wooden, single story structure, newly built at the end of 1955, with white lime walls and a gray cement tile roof, measuring about 40 meters long, eight (8) meters wide, and four (4) meters high. This has a non-coated fence extending from its eastern end to a road to the east of it.
- 18) Kuje-dong Internal Affairs Sub-Station, a brick, single story structure with cement walls and a flat, cement concrete roof, measuring about seven (7) meters long, six (6) meters wide, and five (5) meters high. This was built sometime during the Japanese occupation and used as a police-box.
- 19) West Haeju-si Market, an area about 50 meters wide and long with no structures.
- 20) Haeju-si T'aebong-dong Office, part of a civilian house. This is four (4) sided, wooden, and single story structure of Korean style with white lime walls and a black tile roof, measuring about 70 meters long, three (3) meters wide, and three (3) meters high.
- 21) Official Residences, Haeju-si Internal Affairs Station, approximately ten (10) structures similar in size and shape to those in Item (7) above.
- 22) Official Residence, Chairman, Hwanghae-namdo Committee, Korean Labor Party, located in Okkye-dong, Haeju-si and built sometime during the Japanese occupation. This is a brick, single story structure with gray cement walls and a gray, uniform slate roof, measuring about 12 meters long, 12 meters wide, and 3.5 meters high.
- 23) Haeju-si Open-Air Theater, a structure, built along a mountain slopes before the war, with 400 to 500 concrete seats and a brick, single story stage for

(6) meters high, and five (5) meters wide, is coated with cement inside and outside. There are no walls behind the public seats.

- 24) Liberation Tower, a cement concrete monument, built following the Liberation and measuring about six (6) meters long, six (6) meters wide, and eight (8) meters high.
- 25) Haeju-si Provincial Theater, a brick two (2) story structure, constructed around the end of 1954 and provided with a steam-heating system, with gray cement walls and a gray, uniform slate roof, measuring about 45 meters long, 25 meters wide, and ten (10) meters high. There is a square in the south of this theater.
- 26) Hwanghae-namdo Broadcasting Station, a brick, single story structure, built before the war, with yellow, cement walls and a gray, uniform slate roof, measuring about 18 meters long, eight (8) meters wide, and five (5) meters high.
- 27) Three (3) Antennae, belonging to the Hwanghae-namdo Broadcasting Station and located on the top of a hill.
- 28) Haeju-si National Insecticide Factory, an underground structure with two (2) entrances on the both sides, measuring about 20 meters long, seven (7) meters wide, and four (4) meters high and showing a round, grass area outside, about one (1) meter above the ground.
- 29) Haeju-si Liberation Stadium, the largest one in Haeju-si, built following the Liberation. This has a commanding post on the northern side and public seats and measures about 200 meters in length and 130 meters in width. Behind the commanding post, at a spot about 15 meters north from this stadium in the city plan of Haeju-si, there is a statue of CHO Ok-hui (NTA) (Female), who died fighting with enemy as the chairman of the Haeju-si Women's League during the war.
- 30) Haeju Economics Professional School, a brick, single story structure with gray, cement walls and a cement tile roof, measuring about eight (8) meters long, ten (10) meters wide, and five (5) meters high.
- 31) Okkye-dong Office, a wooden, single story structure with white lime walls and a red tile roof, measuring about 12 meters long, six (6) meters wide, and 3.5 meters high and built newly early in 1956.
- 32) Official Residences, Haeju-si Automotive Station, approximately 13 structures of the same type as those described in Item (7) above.
- 33) National Store (Number unknown), a wooden, single story structure with non-coated wooden walls and a non-coated tin roof, built after the truce and measuring about eight (8) meters long, four (4) meters wide, and 3.5 meters high.

in the north as shown in the city plan, is a brick, single story structure with cement walls and a non-coated tin roof, used for the repair and maintenance of automobiles and measuring about 35 meters long, eight (8) meters wide, and 3.5 meters high, another in the south a presumably storehouse structure with red brick walls and a non-coated tin roof, measuring about 30 meters long, six (6) meters wide, and five (5) meters high. On the western side of this storehouse-like structure are sold bus tickets. The last one situated on the eastern side in between the above two (2) buildings is a wooden, single story structure with white lime walls and a cement tile roof, used as the office and measuring about 15 meters long, six (6) meters wide, and three (3) meters high. At a spot about five (5) meters apart from the office, there is installed a gasoline pump. (This station operates buses in and around Haeju-si. Passengers have to buy their tickets and get on buses here.)

- 35) Haeju-si "Hwanggyo" (Local Confucian Institute), two (2) structures, newly constructed at the place in October 1956 where it had been until the war; one on the northern side is of Korean style with white lime walls and a black roof of Korean tile, measuring about 12 meters long, seven (7) meters wide, and 3.5 meters high, the other on the southern side of the same type but of the half size.
- 36) Hwanghae-namdo Prosecutor's Office, a brick, two (2) story structure, repaired of its war damages and enlarged in the autumn of 1955, with cement walls and a cement tile roof, measuring about 45 meters long, eight (8) meters wide, and seven (7) meters high. This is surrounded by a black coated wooden fence about three (3) meters high.
- 37) Official Residences, Haeju-si International Affairs Station, structures, located in Paegim-dong, Haeju-si, with mud walls and straw roofs, each housing three (3) households and measuring about 18 meters long, five (5) meters wide, and 3.5 meters high.
- 38) Haeju-si Internal Affairs Station, three (3) buildings surrounded by a stone fence with dimensions of 120 meters in length, 110 meters in width, and two (2) meters in height. The main building, one of the three, located at the middle of the eastern side inside the fence, is a two (2) sided, wooden structure of two (2) stories with gray cement walls and a flat, cement concrete roof, measuring about 60 meters long, ten (10) meters wide, and eight (8) meters high. This was built before the war and repaired of its war damages following the truce. The female clerical workers' dormitory, another of the three, located on the north-eastern side, is a wooden, single story structure with white lime walls and a gray cement tile roof, measuring about 12 meters long, four (4) meters wide, and 3.5 meters high and built newly in 1954. The last one for unknown use is a wooden, single story structure with white lime walls and a non-coated tin roof, measuring about ten (10) meters long, three (3) meters wide, and three (3) meters high. (Note: For possible

- 39) Haeju-si People's Committee, three (3) buildings surrounded by a cement fence with dimensions of 70 meters in length, seven (7) meters width, and two (2) meters in height; one, situated in the northwest inside the fence, is a brick, two (2) story structure with cement walls and a flat, cement concrete roof, measuring about 30 meters long, seven (7) meters wide, and seven (7) meters high; another, about three (3) meters east from the above, a brick, two (2) story structure of the same type; and the last, about 20 meters south from the latter, of wood and single story with white lime walls and a cement tile roof, measuring about 16 meters long, six (6) meters wide, and four (4) meters high. Of the three structures above, the two storied buildings were reconstructed and installed with a steam heating system following the truce, and the remaining single storied one was built following the truce.
- 40) Official Residences, Haeju-si People's Committee, eight (8) structures, built following the truce, of wood and single story with white lime walls and red tile roofs, each measuring about 12 meters long, three (3) meters wide, and three (3) meters high and housing two (2) households.
- 41) Swimming Pool, a cement concrete structure, existing since the days of the Japanese occupation, with measurements of 30 meters long, 20 meters wide, and four (4) meters deep.
- 42) Public Garden & Children's Playground, a park with a fountain and many trees inside, requiring no admittance fee. The northern part of this is a children's playground.
- 43) Yonhap-tong Office, a wooden, single story structure, built shortly after the truce, with white lime walls and a tile roof of Korean style, measuring about 18 meters long, five (5) meters wide, and 3.5 meters high.
- 44) Unidentified Government Agency, a brick, single story structure with cement walls and a cement tile roof, measuring about 20 meters long, seven (7) meters wide, and 3.5 meters high.
- 45) Haeju Teachers' College, a two (2) story structure of brick, constructed in July 1957, with red brick walls and a red tile roof, measuring about 80 meters long, 12 meters wide, and seven (7) meters high and installed with a porch about five (5) meters high protruding from the main body at the center.
- 46) Fire Station (this designation is not certain to Subject), a brick, single story structure with cement walls, a cement tile roof, and a fire watching tower about five (5) meters high. This approximately measures 20 meters long, ten (10) meters wide, and six (6) meters high.

- built during the Japanese occupation, with cement walls and a flat, cement concrete roof, measuring about 22 meters long, 22 meters wide, and eight (8) meters high.
- 48) Haeju-si Committee, Korean Democratic Party, a two (2) story structure, existing since the days of the Japanese occupation, of brick with cement walls and a flat, cement concrete roof, measuring about 23 meters long, 20 meters wide, and eight (8) meters high. This is presumed to be the Haeju-si Committee of the Korean Democratic Party since the people were calling it the "City Democratic Party".
- 49) Hwanghae-namdo Automobile Management Office, a pre-war structure of brick and two (2) stories with lime coated cement walls and a tin roof, measuring about 22 meters long, 20 meters wide, and seven (7) meters high and located close to the People's Market described in Item 112 below.
- 50) Foreign Store, a pre-war structure, located in Haeun-dong, Haeju-si, of wood and single story with white lime walls and a black tile roof of Korean style, measuring about 40 meters long, three (3) meters wide, and 3.5 meters high.
- 51) Haeju-si Commercial Management Station, a pre-war structure of single story and brick with cement walls and a gray, uniform slate roof, measuring about 20 meters long, eight (8) meters wide, and 3.5 meters high and surrounded by a non-coated, wooden fence about two (2) meters high.
- 52) Air Club, a two (2) sided, wooden structure of single story, located in Haeun-dong, Haeju-si, with white lime walls and a black tile roof of Korean style, measuring about 55 meters long, three (3) meters wide, and 3.5 meters high. This is a place where lectures on airplanes and air navigation are given.
- 53) Unidentified Cooperative, a wooden, single story structure with mud walls and a gray cement tile roof, measuring about 18 meters long, six (6) meters wide, and 3.5 meters high.
- 54) Laborers' Apartment House, a brick, two (2) story structure, constructed at the end of July 1957, with red brick walls and a red tile roof, measuring about 35 meters long, ten (10) meters wide, and eight (8) meters high.
- 55) National Hotel (Number unknown), a brick, two (2) story structure, located in Haeun-dong, Haeju-si and built newly in the spring of 1956, with red brick walls and a red tile roof, measuring about 35 meters long, 12 meters wide, and seven (7) meters high.
- 56) Laborers' Apartment House, of the same structure as Item (54) above.

- single story with lime coated cement walls and a flat, cement concrete roof, measuring about 12 meters long, ten (10) meters wide, and five (5) meters high.
- 58) National Hotel (Number unknown), a pre-war structure of wood and single story with white lime walls and a gray, uniform slate roof, measuring about 12 meters long, seven (7) meters wide, and 3.5 meters high.
- 59) Haeju Motion Picture Theater, a brick, single story structure with gray cement walls and a gray cement tile roof, measuring about 40 meters long, 30 meters wide, and six (6) meters high.
- 60) Hwanghae-namdo Construction Trust, a wooden, single story structure, newly built in the autumn of 1956, with white lime walls and a red tile roof, measuring about 40 meters long, eight (8) meters wide, and three (3) meters high and surrounded by a non-coated wooden fence about 2.5 meters high, inside which four (4) to six (6) trucks are usually observed.
- 61) National Match Factory: (Further details are unknown to Subject due to his observations of several times at a distance.)
- 62) Official Residences, Provincial Theater, five (5) structures, built around the end of 1954, of wood and single story with white lime walls and red tile roofs, each measuring about 12 meters long, and three (3) meters wide, and 3.5 meters high and housing two (2) households.
- 63) Haeju Central Hospital, two (2) pre-war structures, the one, situated in the north, of brick and two (2) stories with walls of cement lower halves and of red brick upper halves and a red tile roof, measuring about 40 meters long, eight (8) meters wide, and eight (8) meters high, the other, the main building completely reconstructed in March 1957, of brick and two (2) stories with gray cement walls, a flat, cement concrete roof, and two (2) sides, measuring about 60 meters long, eight (8) meters wide, and eight (3) meters high.
- 64) Haeun Primary School, a brick, two (2) story structure, mostly completed as of early August 1957, with the general appearance as shown in the city plan, having red brick walls and a red tile roof and measuring about 80 meters long, ten (10) meters wide, and eight (8) meters high.
- 65) Sami-dong Internal Affairs Sub-Station, an old, two (2) story structure of brick with cement walls and a uniform slate roof, measuring about 15 meters long, seven (7) meters wide, and seven (7) meters high.
- 66) East Market, Haeju-si, a market area with no stores installed in it, measuring about 50 meters wide and long.
- 67) Structure, presumably used as a metalsmith judging from the type of its

roof, measuring about 20 meters long, seven (7) meters wide, and five (5) meters high.

- 68) Unidentified Fuel Oil Supply Station, a brick, single story structure with dimensions of eight (8) meters long, eight (8) meters wide, and four (4) meters high, surrounded by a barbed wire fence about 30 meters long, 30 meters wide, and 2.5 meters high. This station was observed to be supplying automobiles of unknown organization with gasoline from a tank about three (3) meters in diameter installed on an about three (3) meter high wooden supporter.
- 69) Structure, belonging to an unknown cooperative, of stone and single story with stone walls and a red tile roof, measuring about 25 meters long, eight (8) meters wide and four (4) meters high. This was newly built in early 1957.
- 70) Unidentified Installation, Hwanghae-namdo Construction Trust, a brick, single story structure, newly built around the end of 1955, with red brick walls and a red tile roof, measuring about 30 meters long, eight (8) meters wide, and four (4) meters high.
- 71) Hwanghae-namdo Staff School, two (2) structures, surrounded by a fence with dimensions of 400 meters long in total and two (2) meters high, the one, situated in the west, of brick and two (2) stories with red brick walls and a red tile roof, measuring about 40 meters long, ten (10) meters wide, and eight (8) meters high, the other, about 15 meters northeast of the above, of brick and single story with white walls of unknown materials and a gray cement roof, measuring about 30 meters long, eight (8) meters wide, and four (4) meters high.
- 72) Railroad Station-Front Internal Affairs Sub-Station, a wooden, single story structure, newly built in 1955, with white lime walls and a black coated tin roof, measuring about 18 meters long and five (5) meters wide.
- 73) Art Goods Manufactory, a brick, single story structure, built newly around the end of 1954, with red brick walls and a red tile roof, measuring about 40 meters long, eight (8) meters wide, and 3.5 meters high.
- 74) Pear Orchard (Further details unknown.)
- 75) Structure, probably belonging to the City Consumers' Guild and fenced around with barbed wire about two (2) meters high, of brick and single story with red brick walls and a red tile roof, measuring about 30 meters long, six (6) meters wide, and four (4) meters high.
- 76) Four (4) Uniform Structures, built newly around the end of 1954 and

and single story with red brick walls and red tile roofs, each measuring about 18 meters long, seven (7) meters wide, and four (4) meters high.

these structures were used by its several units including the above section 50X1-HUM

50X1-HUM

- 77) Main Building, Hwanghae-namdo Internal Affairs Department, a brick, two (2) story structure, built during the Japanese occupation and repaired of its war damages following the truce, with lime coated cement walls and a gray cement tile roof, measuring about 45 meters long, 12 meters wide, and eight (8) meters high and surrounded by a fence of cement and brick with dimensions of 280 meters long in total and 2.5 meters high.
- 78) East Haeju Internal Affairs Sub-Station, a wooden, single story structure, newly built following the truce, with white lime walls and a gray cement tile roof, measuring about ten (10) meters long, ten (10) meters wide, and four (4) meters high.
- 79) East Haeju Senior Middle School, a brick, two (2) story structure, slightly repaired following the truce, with gray cement walls and a gray cement tile roof, measuring about 12 meters long, ten (10) meters wide, and eight (8) meters high.
- 80) Railroad Official Residences, approximately 30 structures, newly built right after the truce, of brick and single story with red brick walls and red tile roofs, each measuring about 12 meters long, 3.5 meters wide, and 3.5 meters high and housing two (2) households.
- 81) Unidentified Installation, Railroad Bureau, two (2) structures, about ten (10) meters apart from each other, newly built in early 1956, of brick and single story with red brick walls and red tile roofs, each measuring about 25 meters long, seven (7) meters wide, and four (4) meters high.
- 82) East Haeju Inn, a wooden, single story structure, owned and operated by a civilian, with white lime walls and a black coated tin roof, measuring about ten (10) meters long, 3.5 meters wide, and 3.5 meters high.
- 83) East Haeju National Store, a wooden, single story structure, newly built following the truce, with white lime walls and a gray cement tile roof, measuring about 16 meters long, four (4) meters wide, and four (4) meters high. In the front, there are glass doors.
- 84) East Haeju National Vermicelli Restaurant, a wooden, single story structure, newly built following the truce, with white lime walls and a gray cement tile roof, measuring about 15 meters long, four (4) meters wide, and 3.5 meters high.

8. Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0

built immediately following the truce, with white lime walls and a cement tile roof, measuring about 17 meters long, six (6) meters wide, and 4.5 meters high.

- 86) Installation, Railroad Bureau, three (3) structures, about ten (10) meters apart from one another, of brick and single story with red brick and red tile roof, each measuring about eight (8) meters long, four (4) meters wide, and four (4) meters high.
- 87) Haeju-si Locomotive District, two (2) brick, single story structures with red brick walls and cement tile roofs, each measuring about 30 meters long, ten (10) meters wide, and five (5) meters high. There is another brick structure of single story about one-third of the above in size [REDACTED]
- 88) Haeju National General Factory, two (2) brick, single story structure with red brick walls and gray cement tile roofs, each measuring about 30 meters long and another one about ten (10) meters long. Further details of the above three (3) structures are unknown [REDACTED] 50X1-HUM
- 89) People's Drug Store, Haeju-si, a wooden, single story structure, newly built in 1955, with white lime walls and a gray cement tile roof, measuring about 15 meters long, six (6) meters wide, and three (3) meters high. 50X1-HUM
- 90) Private Inn (Name Unknown), a two (2) sided, wooden structure of single story with white lime walls and a cement tile roof, measuring about 18 meters long, three (3) meters wide, and three (3) meters high.
- 91) Hwanghae-namdo Press Company, a brick, two (2) story structure, newly built in the autumn of 1955, with red brick walls and a red tile roof, measuring about 45 meters long, ten (10) meters wide, and seven (7) meters high.
- 92) Laborers' Apartment House, six (6) brick, two (2) story structures of the same type as described in Item (54) above, forming an angle. Three (3) of them which are situated on the western side were constructed in early August 1957, and the other three (3) in the north had been half completed as of early August 1957.
- 93) Soviet Soldiers' Statue, situated at the center of the road. This statue showing Soviet soldiers with PPSH sub-machine guns on their shoulder was initially built immediately following the Liberation, damaged by some of the South Korean army during the war, and then reshaped shortly after the truce as before. The statue about two (2) meters in height is mounted on a cement foundation about three (3) meters high.

- 94) Suyang Inn (Private), a three (3) sided, wooden structure, located in

Korean tile roof, measuring about 25 meters long, three (3) meters wide, and three (3) meters high.

- 95) Hwanghae-namdo Committee, Youth League, a brick, two (2) story structure, built during the Japanese occupation and repaired of its some war damages following the truce, with gray cement walls and a flat, cement concrete roof, measuring about 23 meters long, 15 meters wide, and seven (7) meters high. This had been used by the Hwanghae-namdo Press Company until the autumn of 1955.
- 96) Installation, Consumers' Guild, a brick, two (2) story structure with red brick walls and a red tile roof, measuring about 40 meters long, ten (10) meters wide, and seven (7) meters high and newly built in the autumn of 1956.
- 97) Private Inn (Name Unknown), a three (3) sided, Korean style structure of the same size as described in Item (94) above.
- 98) Namsan Park, situated on the top of the Nam-san, requiring no admittance fee, and frequented by people even at night for its electric installation.
- 99) Haeju-si General Dispensary, a pre-war, four (4) sided wooden structure of Korean style and single story, with white lime walls and a black, Korean tile roof, measuring about 60 meters long, three (3) meters wide, and three (3) meters high and surrounded by a stone and cement fence about two (2) meters high.
- 100) Haeju-si Branch, Farmers' Bank, a brick, two (2) story structure with lime coated cement walls and a cement tile roof, measuring about 23 meters long, 20 meters wide, and seven (7) meters high. This was repaired of its some war damages following the truce.
- 101) Construction Project, with its foundation work finished as of early August 1957, from which it is presumed that the building under construction is to be big one of brick and more than two (2) stories.
- 102) Haeju National Department Store, a brick, three (3) story structure, built during the Japanese occupation and repaired of its war damages following the truce, with lime coated cement walls and a flat, cement concrete roof, measuring about 30 meters long, 12 meters wide, and ten (10) meters high.
- 103) Primary School (Number Unknown), a pre-war, two (2) sided and two (2) story structure of brick with red brick walls and a gray cement tile roof, measuring about 70 meters long, ten (10) meters wide, and seven (7) meters high.
- 104) Taejung Motion Picture Theater, a pre-war structure of brick and single

meters long, 20 meters wide, and six (6) meters high.

50X1-HUM

- 105) Construction Project, started around June 1957. The size and type of the building under construction presumably for a governmental agency is unknown
- 106) Haeju-si Post Office, a brick, single story structure, built newly immediately following the truce and separated from the Haeju-si Communications Department described in Item (14) above by a fence, with red brick walls and a red tile roof, measuring about 35 meters long, 12 meters wide, and 4.5 meters high.
- 107) Haeju National Restaurant, a stone and cement structure, newly built in 1955, with stone and cement walls and a red tile roof, measuring about 35 meters long, 17 meters wide, and 4.5 meters high. This, the largest restaurant in Haeju-si, had a sign read "Haeju Siktang" until early April 1957 when it was changed to "Haeju Restaurant".
- 108) Haeju-si Branch, Central Bank, a brick, single story structure with white lime walls and a gray cement tile roof, measuring about 23 meters long, ten (10) meters wide, and 4.5 meters high.
- 109) National Public Bathhouse, a brick, two (2) story structure, divided into a bathhouse downstairs and a barber shop upstairs, with lime coated cement walls and a cement tile roof, measuring about 20 meters long, eight (8) meters wide, and eight (8) meters high. (Note: Actually, this is located within the area of the People's Market described in Item (112) below, therefore about 100 meters more south than the location shown in the city plan.)
- 110) 3rd National Hotel, a three (3) sided, wooden single story structure with white lime walls and a gray cement tile roof, measuring about 45 meters long, three (3) meters wide, and 3.5 meters high.
- 111) Private Inn, a newly built, two (2) sided structure of wood and single story.
- 112) Haeju-si People's Market, the largest market area in Haeju-si, measuring about 120 meters long and 110 meters wide. For detailed information on this, see the diagram of this market to be reported later.
- 113) Simwon Inn (Private), a two (2) sided structure of the same type as described in Item (111) above.
- 114) Senil Inn (Private), a structure of the same type as described in Item (111) above.
- 115) Hwanghae-namdo Committee, Korean Labor Party, a pre-war, brick and two (2)

the committee since around the end of 1954, with walls of lime coated cement on the northern side and of red brick on the southern side (the enlarged building) and a cement tile roof, measuring about 45 meters long, ten (10) meters wide, and seven (7) meters high and surrounded by an about two (2) meter high fence of brick and cement.

- 116) Haesong Inn (Private), a four (4) sided, wooden and single story structure of Korean style.
- 117) Haesun Inn (Private), a structure of the same type as described in Item (111) above.
- 118) Primary School (Number Unknown), a brick, two (2) story structure with red brick walls and a red tile roof, measuring about 90 meters long, 12 meters wide, and eight (8) meters high and surrounded by an about two (2) meter high fence of stone and cement.
- 119) Railroad Station-Front Inn (Private), a wooden, single story structure of Japanese style with white lime walls and a non-coated tin roof, measuring about 18 meters long and ten (10) meters wide.
- 120) Haesun-dong Office, a wooden, single story structure of Japanese style with white lime walls, many windows, and a cement tile roof, measuring about 15 meters long, 15 meters wide, and 3.5 meters high.
- 121) National Railroad Station-Front Restaurant, a wooden, single story structure with white lime walls and a cement tile roof, measuring about 25 meters long, ten (10) meters wide, and 3.5 meters high.
- 122) Railroad Station-Front Park, a public installation with electricity and many trees in it, measuring about 80 meters long and 70 meters wide and requiring no admittance fee.
- 123) Haegu Railroad Station, using [redacted] a temporary wooden, single story structure, built in haste following the truce, with white lime walls and a black, tin roof, measuring about 20 meters long, ten (10) meters wide, and five (5) meters high.
- 124) Open Storage Area, belonging to an unknown organization, measuring about 50 meters long and 40 meters wide, and surrounded by a barbed wire fence about two (2) meters high. Inside it, [redacted] there was observed a pile of unknown goods covered with canvas, about 15 meters in height and six (6) meters in diameter.
- 125) Haegu Land Transportation Management Station, performing the same service as that of the former Korea Transportation Company (popularly called "Maruboshi"). This is a wooden, single story structure with white lime walls and a gray cement tile roof, measuring about 15 meters long, six (6) meters wide, and four (4) meters high.

50X1-HUM

50X1-HUM

story with white lime walls and a cement tile roof, measuring about 20 meters long, six (6) meters wide, and 3.5 meters high.

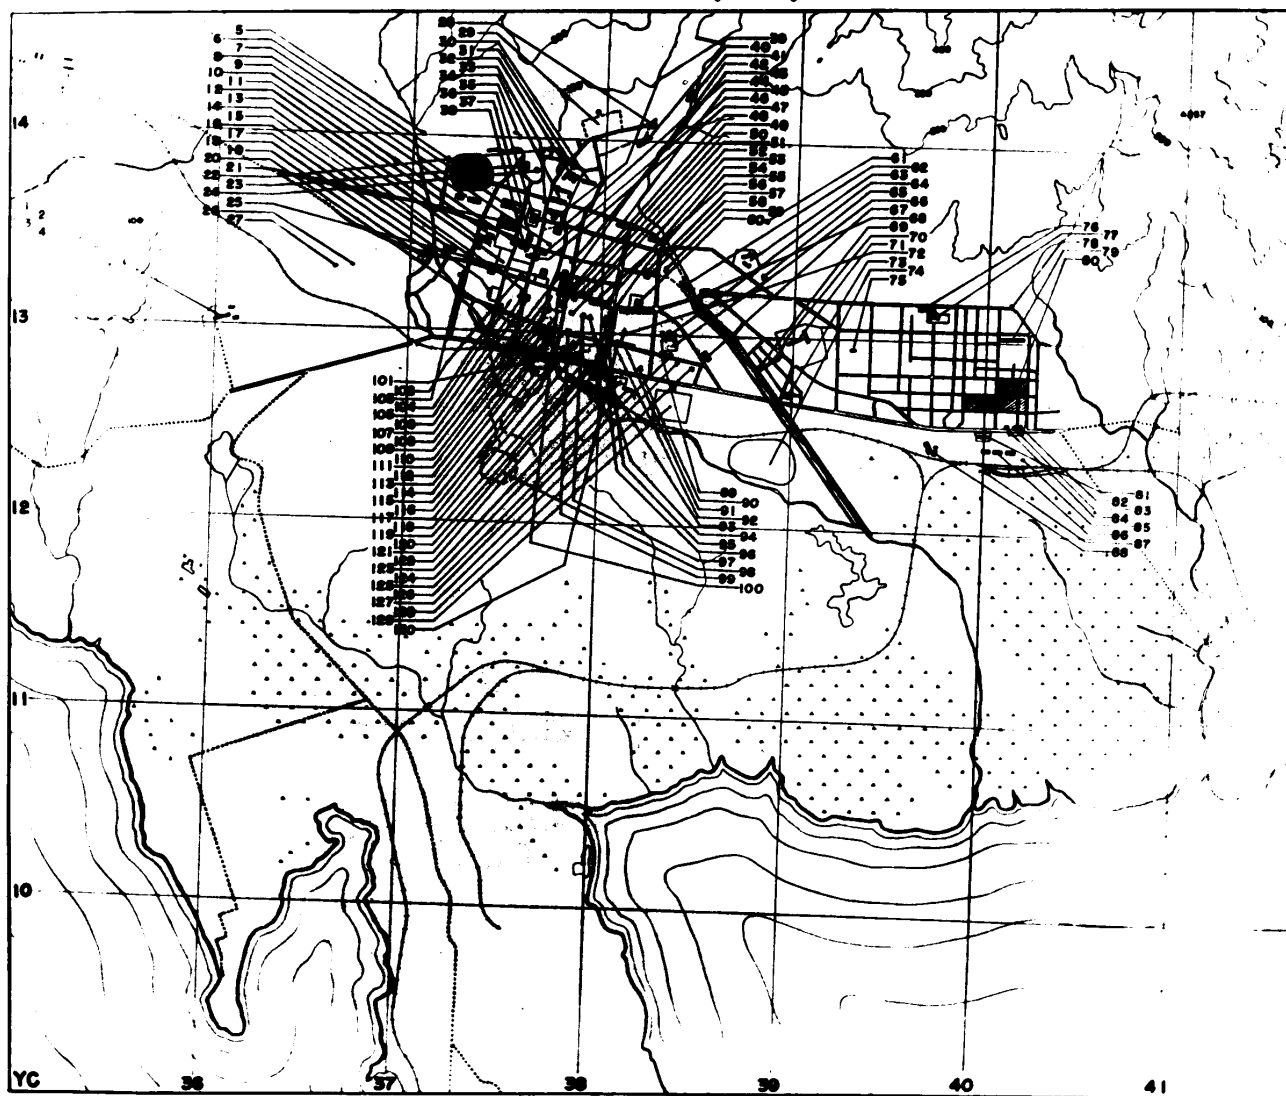

128) Metalsmith, a wooden, single story structure measuring about 20 meters long, seven (7) meters wide, and five (5) meters high and belonging to and unknown organization.

129) Tax-in-Kind Storage Area, used for storing taxes-in-kind collected around Haeju-si since the truce, surrounded by a thrick and cement fence about six (6) meters high and 60 centimeters wide, and measuring about 200 meters long and 150 meters wide. Until before the war, this was a prison. [redacted] about eight (8) piles of grain, each measuring about 13 meters in diameter and eight (8) meters in height, were observed there.

50X1-HUM

130) Haeju Ships Management Station, a wooden, single story structure with white lime walls and a cement tile roof, measuring about eight (8) meters long, six (6) meters wide, and 3.5 meters high.

HAEJU-SI (3-5)

50X1-HUM

From No. 1 through No. 66 described below are the establishments within the Pon'gung Chemical Factory compound.

1. Barbed-wire fence
2. Guard Box - wooden building, approximately two (2) meters long, two (2) meters wide, and 2.5 meters high.
3. Barbed-wire fence
4. Ash dump, utilized by the Carbide and Acetyline Plants.
5. Club

Structure: Lime-coated brick wall; Cement tile roof; Approximately 20 meters long, 20 meters wide, and 8 meters high.

Function: Youth League or Party representatives' meeting is held here, and motion pictures and dramas are shown five (5) times a week during the hours from 1900 to 2200, except for Sundays when an additional show is given at 1200 hours. During the period from the beginning of 1956 through October 1956, only three (3) dramas were performed.

Admission: Free for movies, and 30 Won for dramas; However, everybody's pay was deducted by 30 Won monthly on the purse of showing motion pictures to employees.

Legend to the Club Plan:

- 1) Stairs
- 2) Wicket
- 3) Cement Column
- 4) Entrance, Approximately 2 meters wide and 2.5 meters high.
- 5) Cement staircase, leading the 2nd floor
- 6) Projection booth on the 2nd floor
- 7) Cement passage
- 8) Illumination booth
- 9) Seats, on the 2nd floor
- 10) Seats, on the 1st floor (it extends to the same space of 2nd floor seats.)
- 11) Musicians' seat
- 12) Stage
- 13) Lavatories on 1st and 2nd floor.

6. Acetyline Plant

wide; one (1)-story, red brick-walled, black-painted zinc roofed.

Work: Production of gas.

7. Acetyline Plant Office

Structure: Red brick-walled, cement tile-roofed one (1)-story building; 3 meters high, 10 meters long and wide.

8. Casting Shop, Casting & Forging Plant

Structure: Approximately 20 meters long, 10 meters wide, and 6 meters high; One (1)-story; Red Brick-walled; Zinc roof painted in black.

Number of Employees: Approximately 100

Function: Production of machine parts to be used in the factory; Up to July 1956, 16-hour work was conducted in two (2) shifts, but since then 24-hour work has been performed in three (3) shifts.

9. Aluminum Plant Office

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 15 meters long, 10 meters wide, 7 meters high.

10. Acetyline Tank

Round-shaped tank painted in pink, 8 meters high, and 4 meters in diameter, with signboard reading "No Fire Within 50 meters."

11. Pon'gung Chemical Factory Workers' School

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; T-shaped; Approximately 30 meters long in front, 50 meters long in rear, and 8 meters high. (2nd floor is used all for classrooms.)

Number of Students: Approximately 300

Course: Two (2) years.

Qualification of Applicants: Junior middle school graduates of the age between 17 to 20; Priority is given to the dependents of the factory workers.

Practice: Students undergo practical training at various plants of the factory twice a week, on Tuesday and Friday.

Remarks: Graduates are employed by this factory.

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 15 meters long, 10 meters wide, and 4 meters high,

Function: Swine, cattle, and sheep are butchered to serve a meat-meal daily to the laborers of detrimental plants, such as the Carbide Plant, Soda Plant, Alumdum Plant, and Acetyline Plant.

13. Acacia-trees, approximately 5 meters tall.

14. Yonghyng Transformer Station

Structure: Approximately 20 meters long, 20 meters wide, and 7 meters high; Located within the compound of the factory.

15. Sulphuric Acid Plant

16. Synthetic Plant

Structure: Red brick-walled, black-painted zinc-roofed, one (1)-story building; Approximately 70 meters long, 20 meters wide, and 8 meters high.

Function: Production of gas, which is supplied to all the factories in Hyngnam-si; Therefore, this plant is the heart of all the industrial establishments in the city of Hyngnam.

17. Transformer Repair Shop

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 20 meters long, 10 meters wide, and 6 meters high.

Number of Employees: Approximately 50

Function: Repair of transformers used in the factory.

18. Raw Materials Warehouse

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 70 meters long, 10 meters wide, and 5 meters high.

Materials Stored: Machine oil and parts, labor protection materials, and stationery goods, etc.

Number of Employees: Approximately 60

Structure of Building: Red brick-walled; Zinc roof painted in black; Approximately 25 meters long, 20 meters wide, and 5 meters high.

20. Acetyline Plant

Structure: Approximately 9 meters high, 35 meters long, and 15 meters wide; Three (3)-storied; Smoke-stained red brick wall; zinc roof painted in black.

Function: Production of synthetic rubber from carbide smoke.

21. Packing Vessels Plant

Structure: Red brick-walled, cement tile-roofed one (1)-story building; 3.8 meters high, 25 meters long, and 10 meters wide.

Function: Production of drums; 24-hour work is performed in three (3) shifts by three (3) work teams.

Number of Employees: Approximately 100

Remarks: The signboard reads the "Packing Vessels Youth Plant."

22. Social Security Department

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; 15 meters long, 10 meters wide, and 3 meters high.

Function: All the accidents are investigated by the personnel of this department, who are clad in civilian clothing. For instance, they once investigated the cause of the accident that a 16-year old lathe worker, Yi T'ae-kyu (2621/3141/nta), had his left leg broken by a shaper weighing 500 kilograms, which happened to fall down from the height of one (1) meter. They also investigated the theft cases within the factory.

23. First Aid Station

Structure: Red brick-walled, cement tile-roofed one (1)-story building; Approximately 3 meters high, 13 meters long, and 10 meters wide.

Number of employees: two (2) doctors and six (6) nurses.

_____ This is detached from the Pon'gung Chemical Factory Hospital.

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 4 meters high, 20 meters long, and 20 meters wide.

25. Motor Repair Plant

Structure: One (1)-story, red brick-walled, cement tile-roofed.

Building Size: Approximately 20 meters long, 10 meters wide, and 4 meters high.

Type of Work: Repair of motors used in the factory.

Number of Employees: Approximately 20

Plant Plan:

- 1) Trolley rail
- 2) Wooden board, on which motors are placed to be repaired; Approximately 1.2 meters wide, 1.2 meters high.
- 3) Drying shop (motors repaired are dried in this shop); Approximately 3.5 meters long, 3 meters wide, and 3 meters high.
- 4) Door, two (2) leaves; Approximately 2.5 meters long, 2 meters wide.
- 5) Wooden board, on which motors are placed to be repaired; Approximately 1.2 meters high, 2 meters long, 1 meter wide.
- 6) Cement floor
- 7) Glass window; Approximately 2 meters long, 2 meters wide.
- 8) Brick wall
- 9) Trolley turntable

26. Nitro-Lime Plant

Structure: Red brick-walled, cement tile-roofed, three (3)-story building; Approximately 9 meters high, 20 meters long, 15 meters wide.

Remarks: This is a section of the Carbide Plant.

27. Guard Post

A wooden structure, 1.5 meters long, 1.5 meters wide, and 2.5 meters high; Manned by one (1) guard day and night.

28. Barbed-wire fence

29. Electric Work Plant

Structure: One (1)-story, red brick walled, black-painted zinc roofed.

Type of Work: Electric wiring work within the factory.

Legend to Front View of the Plant:

- 1) Ainc roof
- 2) Glass window; Approximately 1.5 meters square.
- 3) Signboard
- 4) Wooden door; Approximately 2.20 meters long, 1.2 meters wide.

30. Raw Materials Plant Office

Structure: Cement tile-roofed, red brick-walled one (1)-story building; Approximately 3.5 meters high, 8 meters long, and 6 meters wide.

Number of Clerks: Estimated to be less than 10 men.

31. Raw Materials Plant

Structure: Two (2)-story building; front and back sides of 1st floor have no wall, but angle-iron supports, and the other two (2) sides are zinc walled; Approximately 10 meters high, 40 meters long, and 7 meters wide; Zinc roof painted in black.

Lime Furnace: Round furnace constructed of red brick; Approximately 6 meters high, 2.5 meters in diameter; There are 10 these furnaces in this plant.

Type of Work: Production of quick lime, by heating the mixture of limestone and anthracite at 600 degrees; quick lime is carried by trolleys to the Carbide Plant and Soda Section; three (3)-shift 24-hour work is performed by three (3) teams.

Number of Employees: Approximately 150 (40 percent female)

Legend to Front View of the Plant:

- 1) Zinc roof painted in black
- 2) Rail for scoopers installed on the 2nd floor
- 3) Scoopers, set on both sides on the 2nd floor
- 4) Limestone or anthracite brought by trolleys are lifted here by the scooper on to the tops of the two lime furnaces set at the left and right sides.
- 5) Iron sheet on the furnace to hold quick lime and anthracite, which were shovelled into the furnace by laborers.
- 6) Window with shelter

- 8) Zinc wall
- 9) Lime furnace
- 10) Trolley rail
- 11) Trolley rail, leading to the rear

32. Transformer Shop, Raw Materials Plant

Structure: Cement tile-roofed, red brick-walled; Approximately 3.5 meters high, 6 meters long, and 5 meters wide.

33. Carbide Furnace: Four (4) furnaces from No. 1 to 4, of which No. 1 furnace was completely reconstructed by the laborers of the factory during the period from April to 15 August 1956.

Number of Employees: Approximately 300, including about 50 female workers.

Work Hours: 24-hour work is conducted in three (3) shifts by four (4) teams, and the relieved team rests for the following 24 hours. The team on duty is again divided into two (2) units, working on 30-minute shifts. However, the workers of the office, bath, and "detriment" restaurant work eight (8) consecutive hours.

Work Process: Quick lime and coal are carried in trolleys by laborers from the Raw Materials Plant, and put on the furnace by a scooper, and then the mixture of these two (2) is shovelled into the furnace by laborers, who keep feeding the furnace with coal and quick lime while the inside is heated by the electrode switched on. Approximately three (3) times a day, carbide is drained from the drain hole of approximately 10 centimeters in diameter, which is stoppered during the hours of heating. The carbide drained is filled into iron barrels on trolleys, which are pushed by laborers to the balance and weighed when the carbide sets. Generally, one (1) iron barrel-full carbide weighs 1.5 tons. The settled carbide is then carried to the crusher, where the laborers crush it into large lumps before putting it into the crusher. The small lumps are filled into drums, which is then sealed and labelled. According to hearsay carbide is exported to China and Soviet Union.

Plant's Slogan: "One (1) ton of carbide is worth one (1) ton of rice or one (1) and a half tons of yellow millet"; "Secure 50 cubic centimeters as for the quality of carbide." (The amount of gas exhaled from one gram of carbide).

Legend to Plant Plan: (Concave-shape building, approximately 60 meters long on one side, 50 meters on the other side, and 20 meters wide.)

- 1) Trolley rail

- 4) Carbide furnace No. 1
- 5) Carbide furnace No. 2
- 6) Carbide furnace No. 3
- 7) Carbide furnace No. 4
- 8) Balance
- 9) Transformer shop
- 10) Carbide crusher
- 11) Office
- 12) Bath
- 13) "Detriment" mess hall (meal is served free once a day only to the laborers feeding the furnace with raw materials.)
- 14) Entrance
- 15) Glass window
- 16) Cement, round chimney; Approximately 35 meters long, 3 meters in diameter at the bottom, and 2 meters in diameter on the top.
- 17) Angle-iron pole
- 18) Nitro-line Plant

Front View of the Plant: (Approximately 10 meters high).

- 1) Zinc roof, painted in black
- 2) Cement, round chimney
- 3) "Detriment" mess hall window
- 4) Bathroom window
- 5) Door
- 6) Transformer shop
- 7) Electrode
- 8) Carbide furnace
- 9) Scooper's rail

34. Cement Chimney, not being used

Approximately 3.5 meters long, 3 meters in diameter at the bottom, and 2 meters in diameter at the top; Round shape; the factory building was completely damaged, and only the chimney is left at present; This will be utilized by a factory to be constructed here in future.

35. High-Tension Electric Tower

Approximately 25 meters high; Made of angle steel.

36. Ammonium Chloride Plant

Structure: Two (2) red brick-walled three (3)-storied buildings; Approximately 30 meters long, 13 meters wide, and 10 meters high; As of spring 1956, under construction.

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 25 meters long, 20 meters wide, and 8 meters high.

Remarks: This building includes the factory Youth League, Women's League, and Trade League offices.

38. Day Nursery

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 15 meters long, 10 meters wide, and 3.5 meters high.

39. Electric Plant

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 20 meters long, 10 meters wide, and 3.5 meters high.

Function: Repair of transformers

Remarks: This building includes the Electric Plant office and the factory telephone switch board.

40. Reservoir

41. Concrete Dam

42. Two (2) buildings for maintenance of the reservoir

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 25 meters long, 25 meters wide, and 3.5 meters high each.

43. Barbed-wire fence, approximately 1.5 meters high.

44. Guard Box

Wooden building, approximately 1.5 meters long, 1.5 meters wide, and 2.5 meters high, manned by one guard day and night.

45. Hyingnam National Pharmaceutical Factory

This factory, separated from the Pon'gung Chemical Factory following the armistice, has approximately 30 buildings of various heights.

46. Bath

Structure: Red brick-walled, cement tile-roofed; Approximately 15 meters long, 7 meters wide, and 3.5 meters high; Utilized only by the soda department workers.

The structure of the building is unknown, but it includes the Soda Plant, Sulphuric Acid Plant, Bleaching Powder Plant, and Hexachlorine Plant.

48. Alumdum Plant

Structure: One (1)-story, black-painted zinc-roofed; Approximately 40 meters long, 15 meters wide, 5 meters high.

Number of Employees: Approximately 130 male and 20 female workers.

Function: Production of materials for grinder and sand paper.

Remarks: Each of four (4) electric furnaces turns out five (5) tons of alumdum at a time; Raw materials used here are limestone, anthracite, and waste iron.

49. Boiler Plant

This plant occupies approximately 15 meters of the Seasonings Plant building.

50. Mafic Metals Casting Shop, Casting and Forging Plant

Structure: Red brick-walled, black-painted zinc-roofed, one (1)-story building; Approximately 20 meters long, 10 meters wide, and 6 meters high.

Number of Employees: Approximately 20

Function: Casting of lead, copper, and babbitt products, which are finished at the Machine Plant.

51. Machine Plant Office

Structure: Brick-walled, cement tile-roofed, U-shaped building; Approximately 19 meters long on the one side, and 18 meters long on the other side; The eastern side is one (1)-storied, and the western side is two (2) storied.

Legend to the Office Building Plan:

- 1) Machine Plant Office - Five (5) meters long, nine (9) meters wide, one four (4) meters high; White-plastered wall; Wooden door, 2.2 meters long, 1.5 meters wide; Equipped with four (4) desks; Plant Chief: KIM Kyn-pae [redacted]; Machine Inspector: YI In-sok [redacted] Clerks: PAK Pong-nyo (Female; [redacted] and one other (female); Office Hour: 0800 - 1700.

50X1-HUM

- 3) Cement passage (Approximately two (2) meters wide)
- 4) Cement passage (Approximately 1.7 meters wide)
- 5) Wooden door, approximately 1.5 meters wide and 2.2 meters long.
- 6) Carpenter's shop - Approximately four (4) meters high, three (3) meters wide, and nine (9) meters long; white-coated wall; Seven (7) carpenters are producing wooden molds to be used at the Casting and Forging Plant.
- 7) Tool Storage, Machine Plant - Stored in the storage are bite, cutter, calipers, micrometer, protractor, jack, tap, drill, file, chisel, rags, and machine oil.
- 8) Lavatory
- 9) Democratic Propaganda Office, Machine Plant - Approximately 7 meters wide, 9 meters long, 3 meters high; Wooden door, approximately 2.2 meters and 1.5 meters; Equipped with six (6) desks and 12 chairs.
- 10) Democratic Propaganda Office, Casting & Forging Plant - Same as that of the Machine Plant.
- 11) Staircase, leading to 2nd floor.
- 12) Staircase, leading to 1st floor
- 13) Chairman's office, Engineering Department Party Committee (2nd floor)
- 14) Meeting Room (2nd floor) - Meetings of plant Party cell chairman under the Engineering Department Party and those of the plant staff workers are held here.
- 15) Engineering Department Party Office (2nd floor) - eight (8) clerks

Explanation of Front View of Casting & Forging Plant and Machine Plant Offices

- 1) Entrance
- 2) Glass Window
- 3) Sign board - Red painted board, approximately 40 centimeters long and 30 centimeters wide, written in white "Machine Plant, Pon'gung Chemical Factory, Ministry of Chemical Industry."

Structure: Brick walled, black-painted zinc roofed; Approximately 30 meters long, 15 meters wide, and 8 meters high.

Number of Employees: Approximately 250, including approximately 50 female laborers and approximately 10 clerks and staff workers.

Function: Production of machine parts used in the factory.

Legend to the Plant Plan:

- 1) Balance
- 2) Balling Machine
- 3) 10-feet Lathes (2)
- 4) Vertical Lathe (1)
- 5) Milling Machine (1)
- 6) 12-feet lathe (1)
- 7) 20-feet lathe (1)
- 8) 30 feet-lathe (1)
- 9) Shaper (1)
- 10) Hopping machine (1) - lathe producing gears
- 11) Shapers (3)
- 12) 18-feet lathe (1)
- 13) 8-feet lathes (15)
- 14) Grinders (2)
- 15) Balling machine, out-of-order (1)
- 16) Planer (1)
- 17) "Darling" (sic) (1)
- 18) Balance
- 19) Hopping machine
- 20) 6-feet lathes (10)
- 21) Trolley rail
- 22) Entrance, approximately three (3) meters long and four (4) meters wide.
- 23) Trolley turntable
- 24) Glass window
- 25) Cement walled ditch
- 26) Thick wooden door, approximately two (2) meters wide and three (3) meters long.
- 27) Passage, leading to Casting & Forging Plant

Front View of Machine Plant:

- 1) Roof
- 2) Glass Window
- 3) Iron door, approximately four (4) meters long and three (3) meters wide; A wicket gate on the right leaf.
- 4) Ditch

- 6) Trolley turntable
- 7) Cement tile roof on the passage leading to the next building.
- 8) Entrance, Approximately 1.5 meters wide.

Remarks: The signboard reads "Youth Plant" (with Russian translation).

53. Forging Shop, Casting & Forging Plant

Structure: Red brick walled, black-painted zinc roofed; Approximately 25 meters long, 13 meters wide, and 8 meters high.

Function: 1st step production of machine parts, including springs.

Shop Plan:

- 1) Trolley turntable
- 2) Iron door, approximately four (4) meters long, and three (3) meters wide.
- 3) Trolley rail
- 4) Forge
- 5) Thick wooden door, approximately two (2) meters wide and three (3) meters long.
- 6) Glass window

54. Pipe Production Plant

Structure: Red brick-walled, black-painted zinc-roofed; Approximately 30 meters long, 15 meters wide, and 8 meters high.

Number of Employees: Approximately 200

Function: Welding work; Production of water tank.

Legend to Plant Plan:

- 1) Balling Machine (1)
- 2) Balling Machines (3)
- 3) Iron sheeting roller (1)
- 4) Trolley rail
- 5) Crane (1)
- 6) Crane rail
- 7) Iron door, approximately four (4) meters long and three (3) meters wide.
- 8) Thick wooden door, approximately two (2) meters wide, and three (3) meters long.
- 9) Glass window
- 10) Trolley turntable

55 Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0

Structure: Red brick-walled, black-painted ainc-roofed, one (1)-story building; Approximately 35 meters long, 10 meters wide, and 8 meters high.

Function: Rectification of current, from alternative to direct current.

56. Factory Manager's Office

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 20 meters long, 15 meters wide, and 7 meters high.

Manager: CHANG Ch'ø1 (1728/0811)

50X1-HUM

57. Balance Repair Plant

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 15 meters long, 10 meters wide, and 5 meters high.

Number of Employees: Approximately 15

Function: Repair of balances used in the factory.

58. Repair Plant Office

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 15 meters long, 7 meters wide, and 3.5 meters high.

Function: Construction, plastering, and repair of houses.

59. Labor Department Office

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 20 meters long, 17 meters wide, 3.5 meters high.

Function: Personnel affairs of the laborers of the whole factory are handled here by approximately 20 clerks.

60. Chemical Experimental Station

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 20 meters long, 10 meters wide, and 5 meters high.

Function: Experimentation of chemical products of the factory.

61. Limestone Open Storage

62. Trolley rail

63. Transportation Plant Office

Structure: Red brick-walled, Cement tile-roofed; Approximately 10 meters long, 7 meters wide, and 3 meters high.

64. Guard Office

Structure: Red brick-walled, cement tile-roofed; Approximately 14 meters long, 10 meters wide, 3 meters high.

Function: Approximately 50 guards are on duty in shifts. They are all Party members and approximately 20 percent of them are discharged veterans. They are clad in People's Armed Forces uniforms less insignia all year round, and are armed with a Soviet pistol.

Remarks: In front of the building, a wooden sign, marked "Sanbo" (sic) with white paint on the red-painted ground, is hung.

65. Saw Mill

Structure: Wooden building, approximately 25 meters long, 15 meters wide, and 6 meters high; Operates only daytime.

66. Seasonings Plant

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 35 meters (15 meters for the Boiler Plant) long, 20 meters wide, and 8 meters high.

Function: Production of bean-paste and soy-sauce, including powdered bean-paste used by the People's Armed Forces.

67. Oxygen Plant, Pon'gung Chemical Factory

Structure: Black-painted wooden walled, cement tile-roofed; Approximately 15 meters long, 7 meters wide, and 3.5 meters high.

68. Trolley rail (for delivery of coal to factory residences)

69. Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0

70. Main Entrance

Dirt surface; there is a bulletin board, seven (7) or eight (8) meters wide, on both sides.

71. Embankment

72. Railroad, linking H~~y~~ngnam and Hamh~~y~~ng

73. National Book Store

Structure: Red brick-walled, cement tile-roofed; Approximately 10 meters long, 7 meters wide, and 4 meters high.

Books Sold: Soviet Communist Party History, Selection of Lenin's Works, Selection of Stalin's Works, Selection of MAO Tse-tung's Works, Selection of KIM Il-s~~o~~ng's Works, War and Peace, Russian language text-books (50 W~~o~~n for Book I, and 65 W~~o~~n for Book II), monthly magazines, cartoons and books for children, and stories, such as "How Steel is Hardened," "Reclaimed Land," "Literature for Circle Members," "Zoya and Sula," and "Cherry-tree."

74. Pon'gung Internal Affairs Sub-Station

Structure: Red brick-walled, cement tile-roofed; Approximately 20 meters long, 9 meters wide, 3.5 meters high.

75. Bus Station in front of Yongh~~y~~ng Market

Bus operates between H~~y~~ngnam and Hamh~~y~~ng. One way fare is 30 W~~o~~n.

76. National Purchasing Store.

Structure: Mud-walled, cement tile-roofed; Approximately 10 meters long, 7 meters wide, and 3.5 meters high.

77. Yongh~~y~~ng Market

Approximately 70 meters long and wide; Sectioned by wooden walls into a space of approximately 20 meters long and 8 meters wide as chain-stores; This market includes the National Store, Yongh~~y~~ng National Restaurant, private groceries, tailor shops, shoe-repair shops, watch repair shops, etc., as well as private rice-cake and noodle sellers sitting on the roadsides; This market is patronized comparatively more by the Pon'gung Chemical Factory workers than by other civilians.

Structure: Red brick-walled, cement tile-roofed, one (1)-story building; Approximately 20 meters long, 10 meters wide, and 4 meters high.

Function: Serves with lunch for 45 W^{on}, rice-in-meat soup for 35 W^{on}, liquor for 35 W^{on} per "hop" (only two (2) days a week), and fritters; General public is also allowed to eat here but has to pay an additional charge of 10 W^{on} per dish; Open from 1100 hours to 2200 hours.

79. Cement Bridge, under reconstruction

One (1) wooden bridge is temporarily utilized by the cement bridge. The wooden bridge is approximately four (4) meters wide and three (3) meters high from the surface of the river, which is usually 50 centimeters deep.

80. Unhy^{ng}-dong Office

Structure: Mud-walled, thatched-roof building; Approximately 15 meters long, 7 meters wide, and 3.5 meters high.

81. Consumer's Guild Store

Structure: Board-coated mud-walled, thatched roof; Approximately 10 meters long, 5 meters wide, and 3 meters high.

Articles Sold: Shirts, straw hat, Alaska pollack, fish, Liquor (on national holidays only), cigarettes, toilet goods, soaps, tooth-brushes, soap cases, notebooks, pencils, papers, purses, rubber shoes, etc.

82. Southern District Residences, Pon'gung Chemical Factory

Structure: Red brick-walled, cement tile-roofed two (2)-story buildings; Approximately 35 meters long, 7 meters wide, and 8 meters high each;

Remarks: There are 50 buildings of same structure, each of which is partitioned off into 10 sections, and each section holds two (2) households, one (1) on the 1st floor and the other on the 2nd floor. Each household occupies one (1) room. These buildings were constructed by December 1955.

83. Construction Trust Office

Building: A reconstructed building of approximately 20 meters long and wide.

Remarks: This trust under the jurisdiction of the Ministry of Construction

technicians who were transferred from the Residence Reconstructing Section, approximately 500 workers, including those of the Pon'gung Chemical Factory, in the beginning of 1956, laborers of the plant were transferred to other plants. The plant is provided with a grey-painted Soviet-made truck.

84. Residence Section, Pon'gung Chemical Factory

This section, occupying a reconstructed house, approximately 10 meters long, 7 meters wide, and 3.5 meters high, of cement tile roof, is with the allotment of the thatched houses (national buildings), located in Hyngnam-dong and Unhyng-dong, for the laborers of the Pon'gung Chemical Factory.

85. Hyngnam-dong Office

Structure: Red brick-walled and zinc roofed building; Approximately 10 meters long, 7 meters wide, and 3.5 meters high.

Number of Employees: Approximately five (5).

86. Night Recreation Center, Pon'gung Chemical Factory

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 40 meters long, 30 meters wide, and 8 meters high.

Function: The excellent workers of the Pon'gung Chemical Factory are given free board and room for 15 days a year, while they are working at the factory. However, the workers of the Carbide Plant, Soda Department, Acetylene Plant, Aluminum Plant, and Nitrogen Plant are privileged to have such holidays twice a year. The food expenses of 100 Won per day per capita are paid by the factory.

✓ 87. Pon'gung Chemical Factory Hospital

Structure: Two (2)-story building of white lime-coated brick wall and cement tile roof; Approximately 40 meters long, 30 meters wide, and 8 meters high; Newly constructed.

88. Pon'gung Chemical Factory Dormitory Under Construction

Structure: Two (2) U-shaped buildings of red brick wall and cement tile roof; Each approximately 30 meters long, 10 meters wide, and 4 meters high.

89. Western District Dormitory, Pon'gung Chemical Factory

Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0
Structure: The 1st building is a common hall, approximately 22 meters long, 7 meters wide and 8 meters wide each.

Number of Inmates: Approximately 500

Legend to Dormitory Plan:

- 1) Entrance
- 2) Hot-floor room
- 3) Fuel holes, provided with two (2) pots to heat water for washing face.
- 4) Wash-stand
- 5) Toilet
- 6) Staircase, leading to 2nd floor

90. Pon'gung Chemical Factory Residences

There are seven (7) houses, approximately 35 meters long and 7 meters wide each, which are all occupied by the factory workers.

91. Cement Tile Manufacturing Plant, Pon'gung Chemical Factory

This plant was established in April 1956, and now temporarily employs the family members of the Pon'gung Chemical Factory workers. The laborers receive no rice distribution, but the salary of approximately 2,000 Won. The work is performed in two (2) shifts, day and night, by approximately 300 laborers. The production of tile is done on the open ground and finished ones are kept in a zinc roofed hut without walls.

92. Staff's Residence, Pon'gung Chemical Factory

Approximately 20 buildings of same structure, approximately 10 meters long, 8 meters wide, 3.5 meters high, with tile roof and no fence. The manager and other staff workers as well as five (5) East German advisors are living in these residences.

93. Former Site, Pon'gung Chemical Factory Hospital

Structure: Red brick-walled two (2)-story building of cement-built flat roof; Approximately 25 meters long, 20 meters wide, and 8 meters high.

Remarks: This building, reconstructed after the armistice, had been used for the Pon'gung Chemical Factory Hospital, but present occupant is unknown.

94. Workshop Store, Pon'gung Chemical Factory

Structure: Red brick-walled, cement tile-roofed, L-shaped building; Approximately 25 meters long on one (1) side, 20 meters long on the other side, 7 meters wide, and 4 meters high.

95. Pon'gung Chemical Factory Residences Under Reconstruction and Construction

A total number of 41 buildings are now being reconstructed or newly constructed by unidentified People's Armed Forces. Most of them are two (2)-story buildings, approximately 35 meters long, 7 meters wide, and 8 meters high, and several are of one (1)-story, approximately 35 meters, 7 meters wide, and 4 meters high.

96. Northern District Dormitory, Pon'gung Chemical Factory

Structure: Red brick-walled, tile-roofed, and U-shaped two (2)-story building; Approximately 25 meters long in the front, 25 meters long on both sides, 7 meters wide, and 8 meters high.

Remarks: This building, presently accommodating approximately 300 bechelor workers, was reconstructed toward the end of January 1951 by the Reconstruction Plant of the factory.

97. Eastern District Residence, Pon'gung Chemical Factory

There are 15 buildings of same structure, two (2)-storied, red brick-walled, and cement tile-roofed; Approximately 35 meters long, 7 meters wide, and 8 meters wide; Reconstructed in 1955 by the factory laborers; Occupants are mostly laborers.

98. Tokhyng-dong Residences, Pon'gung Chemical Factory

A total number of 50 houses were reconstructed by the laborers of the factory during the period from February to mid-August 1956. All of them are of same structure; white lime-coated, mud block-walled, one (1)-story building, approximately 35 meters long, 6 meters wide, and 3 meters high.

99. Primary School

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; newly built; Approximately 80 meters long, 14 meters wide, and 8 meters high; Equipped with a play ground, approximately 150 meters long and 100 meters wide.

100. Newly-Built Residences, Hyngnam National Fertilizer Factory

Number of Residences: Approximately 40 (completed by 14 August 1956)

Structure of Each House: White lime-coated mud-walled, cement tile-roofed building, approximately 25 meters long, 6 meters wide, and 3.5 meters high.

101. SCHOOL (Newly Constructed)

This school of 10-year course (four (4) years for primary course, three (3) years for junior middle course, and three (3) years for senior middle course), newly constructed after the armistice, consists of one (1) three (3)-storied building of white lime-coated brick wall and cement tile roof, approximately 110 meters long, 14 meters wide, and 11 meters high. It has a 150 meters long and 100 meters wide playground.

102. Orphanage, Newly Constructed After Armistice

Structure: Cement tile-roofed building, approximately 20 meters long, 7 meters wide, and 3.5 meters high.

Number of Orphans: Approximately 30

103. Liberation Park - Mass meetings are occasionally held here.

104. Roadblock, constructed of rail during the Korean War (Presently a detour is utilized for traffic.)

105. Herb Medicine Clinic - Mud-walled Korean-style house

106. Ch'on'gi-dong Market

This market, established after the armistice, has many small stores, each approximately four (4) meters long and wide and two (2) meters high, all facing to the inside of the market. Included in this market are the rice store, restaurant, tablewares store, grocery store, tailor shop, Dye-stuff store, watch repair shop, toiletries store, fish store, stationeries store, and sport-shoes & rubber shoes store, as well as the national store and private stores. There are also fruits or rice-cake sellers sitting on the road side within the market. Usually, it is more crowded on Sundays.

✓ 107. Hwangnam Railroad Station, Newly Constructed

There are two (2) red brick-walled, cement tile-roofed buildings belonging to this station. One is approximately 25 meters long, 10 meters wide, and 4 meters high, and the other, approximately 15 meters long, 8 meters wide, and 4 meters high.

108. Internal Affairs Sub-Station

109. National Foodstuffs Factory

50X1-HUM

110. Bus Terminal

This is the Hyngnam-Hamhyng bus terminal provided with a ticket office, approximately 15 meters long, 5 meters wide, and 3 meters high, of mud wall and cement tile roof.

111. Hyngnam-si Communications Department (Reconstructed)

Structure: Red brick-walled, cement tile-roofed building; Approximately 25 meters long, 10 meters wide, and 4 meters high.

112. National Fertilizer Factory Workers' School

Structure of Building: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 50 meters long, 13 meters wide, and 8 meters high.

Course: Two (2) years

Qualification of Applicants: Junior middle school graduates of ages between 17 and 20, of the family members of the Fertilizer Factory workers.

113. Railroad Bridge, approximately 15 meters long and three (3) meters high from the ground, with cement-built ends; Two roads, each approximately seven (7) meters wide, run on both sides of the cement support wall, approximately 40 centimeters thick, underneath the bridge.

114. Hyngnam-si People's Committee

Structure: Red brick-walled, cement tile-roofed building; Approximately 30 meters long, 13 meters wide, and 4 meters high; Hedged by a barbed-wire fence, with an information office at the entrance, which is of wooden wall and cement tile roof, approximately five (5) meters long, four (4) meters wide, and three (3) meters high in size.

115. National Store

Structure: Red brick-walled, cement tile-roofed building; Approximately 20 meters long, 8 meters wide, and 4 meters high.

Goods Sold: Shirts, cloth, rubber shoes, sport-shoes, sneakers, cigarettes, toiletries, matches, notebooks, ledgers, ink, pen-points, pencils, fish, Alaska pollack, dried shells, fruits, mushrooms, garlic, and powdered red pepper.

119.

Structure: Red brick-walled, black tile-roofed, Korean house; Approximately 15 meters long, 7 meters wide, and 3 meters high.

117. Hyŏngnam National Fertilizer Factory Residences

There are 18 houses of same structure, including that indicated in No. 119, most of which are occupied by the laborers.

118. Hyŏngnam-si Internal Affairs Station

This station is utilizing as its office two (2) factory residences, of red brick wall and cement tile roof, approximately 35 meters long, 7 meters wide, and 3.5 meters high. This station is manned by one (1) major, one (1) captain, one (1) senior lieutenant, one (1) lieutenant, and three (3) civilian officials.

119. Hyŏngnam National Fertilizer Factory Residences

Structure of Each Building: Red brick-walled, cement tile-roofed building; Approximately 35 meters long, 7 meters wide, and 3.5 meters high.

120. Hyŏngnam-si Court

Structure: Red brick-walled, two (2)-story building, approximately 10 meters wide, 20 meters long, and 8 meters high; Hedged by a two (2) meters high brick wall.

121. 2nd Dormitory, Hyŏngnam National Fertilizer Factory

Structure: Red brick-walled, cement tile-roofed, U-shaped two (2)-story building; Approximately 40 meters long in the front, 20 meters on both sides, 10 meters wide, and 8 meters high.

Remarks: This dormitory, reconstructed in December 1955, accommodates the bachelor laborers of the factory.

50X1-HUM

122. Hyŏngnam-si Labor Party Committee Building, Reconstructed

Structure: Red brick-walled, cement tile-roofed, two (2)-story building; Approximately 30 meters long, 20 meters wide, and 8 meters high.

123. Sanitized Copy Approved for Release 2010/08/26 : CIA-RDP80T00246A041100680001-0

124. Red Brick-Walled Warehouse, Damaged

125. Hyangnam National Smelter

There are five (5) chimneys, approximately 30 meters long each, within the compound hedged by a barbed-wire fence.

126. Kuryong Market

This market, approximately 50 meters long and 30 meters wide, has three (3) long buildings, which are partitioned into small stores.

127. Guard Post

This guard box, of stone wall and zinc roof, is manned by an internal affairs member day and night. This guard checks fishing boats, including five (5) boats of the Hyangnam Fishing Cooperative, leaving and entering the port. The cooperative's boats are of wooden structure, approximately five (5) meters long, two (2) meters wide, and .7 meters deep (height of hull), and usually are manned by two (2) or three (3) fishermen.

128. Coastal Mine Field

This area is hedged on the road side by a barbed-wire fence, approximately 1.5 meters high and 1,000 meters long, which has a signboard saying "Danger! Mines." This area, mined with anti-personnel mines during the period of Korean War, is overrun with grass during the period of summer.

129. Residences, National Factory No. 17 and Yongsong Machine Manufactory

130. Hyangnam Chemical Professional School

Structure of Building: Red brick-walled, two (2)-story building; Approximately 70 meters long, 15 meters wide, and 8 meters high.

Course: Three (3) years

Qualification of Applicants: Junior Middle School graduates

Sections: Mechanical Chemistry Section, Electrical Chemistry Section, Organic Chemistry Section, Inorganic Chemistry Section.

for the period of three (3) years, after which their own choices are taken into consideration for the reassignment. The new-fledged graduates are mainly assigned to the Pon'gung Chemical Factory, Hyngnam Fertilizer Factory, Cement Factory, and other chemical factories. [redacted] all students of this school except for the expected graduates were inducted into People's Armed Forces as technical soldiers, and the students of the Hyngnam Senior High School were compulsorily transferred to replenish this school.

50X1-HUM

131. Hyngnam Mechanical Professional School

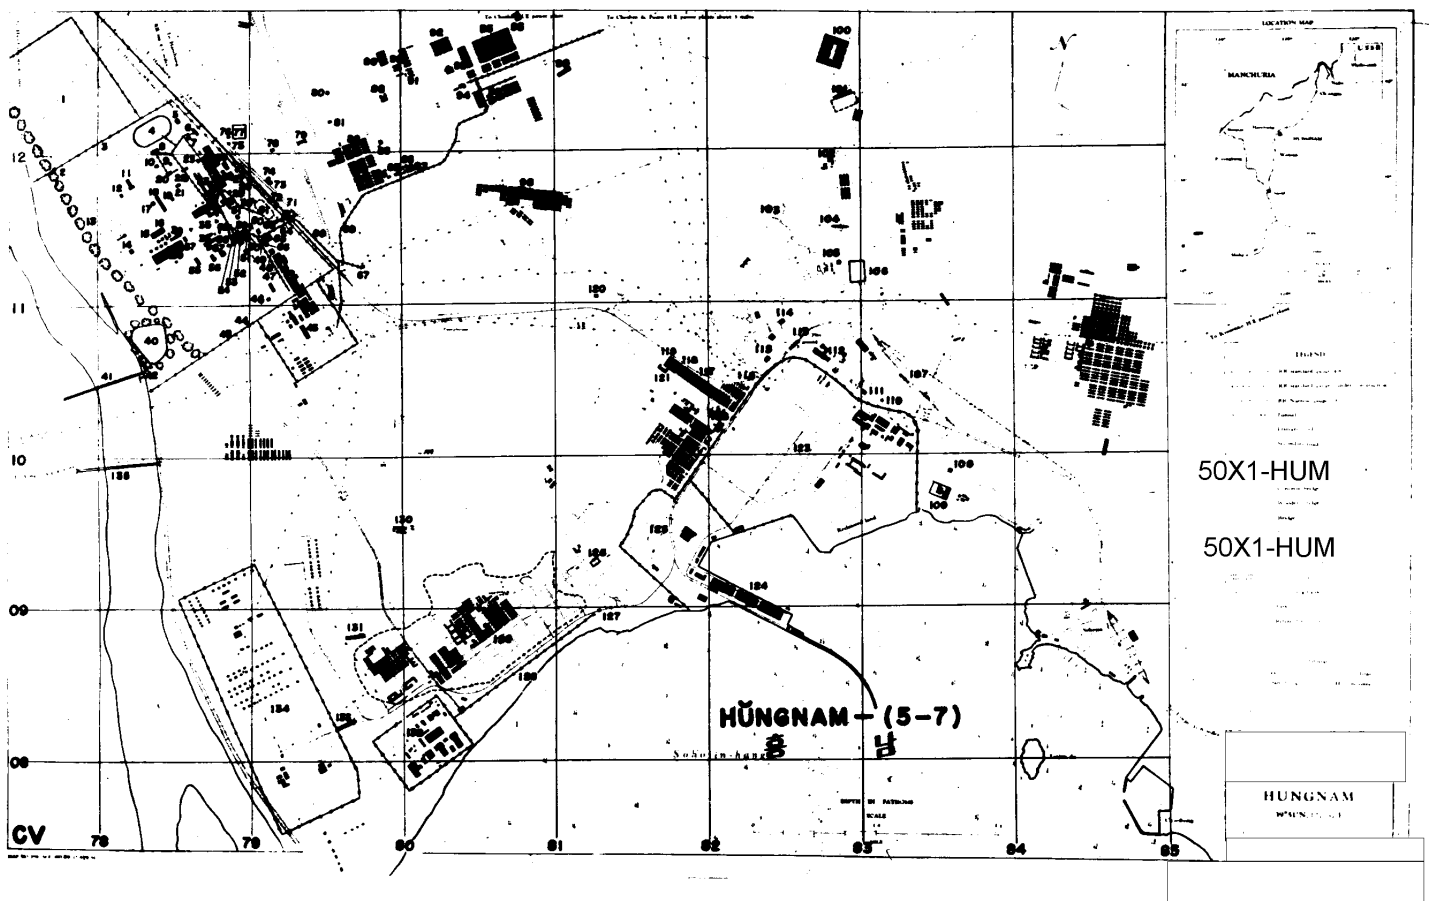

Structure: Red brick-walled, cement tile-roofed building; Approximately 100 meters long, 13 meters wide, and 8 meters high.

Remarks: This school, three (3)-year course, was newly established in August 1956, when the Hyngnam 2nd Senior Middle School ceased to exist.

132. Yongsong Machine Manufactory

133. Cement Bridge, Reconstructed

134. National Factory No. 17

50X1-HUM

I. DETAILS

Geographical Information on Formation of P'anmun-up, the County Seat of P'anmun-gun; Descriptions of Governmental, Social, and Educational Installations in P'anmun-up:

Rate: 3

50X1-HUM

1. The area which now comprises P'anmun-up, P'anmun-gun, Hwanghae-bukto was formerly South Korean territory until the outbreak of the Korean War on 25 June 1950 and was a part of Pongdong-myŏn (BT 9100), Kaep'ung-gun, Kyŏnggi-do. Following the Armistice, as the areas of Kaesŏng-si, Kaep'ung-gun, and Changdan-gun became integrated into North Korean territory, these areas were being called as the Newly Liberated Area. In the fall of 1954, when reorganization of administrative district took place in the Newly Liberated Area, parts of Changdan-gun (BT 9805) and Kaep'ung-gun (BT 9001) newly created P'anmun-gun, and at the same time, three Ri (district) of the former Pongdong-myŏn, i.e., Kodusan-ni (BT 913028), T'andong-ni (BT 8903) and Pongdong-ni (BT 910019), were annexed to form P'anmun-up, the county seat of P'anmun-gun.

50X1-HUM

2. The town of P'anmun-up develops from the cross road at BT 895010 and stretches its arms to the foot of the mountain at BT 89850165, between which the following governmental, social, and educational installations are located:
 - a) P'anmun-gun Consumer's Guild Store: Located at BT 895011 and newly built in 1955, this structure is a one (1)-story, gray slate roof, lime-plastered wall, approximately 15 meters long, three (3) meters wide, and three (3) meters high. Front gate is painted with blue. About five (5) personnel are working. This store sells food and daily necessities and handles the business of ration for the government employees.
 - b) Barber Shop Operated by P'anmun-gun Consumer's Guild: Located at BT 895011 and newly built in 1956, this structure is a one (1)-story, gray slate roof, lime-plastered wall, approximately six (6) meters long, 2.5 meters wide, and two (2) meters high. One (1) barber is working.
 - c) P'anmun Jr. Middle School: Located at BT 89320115, this school started construction in December 1954 and completed in February 1955 in accordance with the Three (3)-Year Economic Plan. This school is a two (2)-story structure, gray slate roof, lime-plastered wall, approximately 75 meters long, 20 meters wide, and eight (8) meters high. The school offers both jr. middle school course and sr. high school course. Approximately 20 teachers are employed. At present, approximately 500

play-ground, approximately 100 m in diameter, surrounds the campus.

- d) School Residence of P'anmun Sr. Middle School: Located at BT 89320115 and newly built in 1957, the residence includes two (2) structures, same in size, which is a one (1)-story, red tile roof, lime-plastered wall, approximately eight (8) meters long, four (4) meters wide, and three (3) meters high. This residence is compartmented into several rooms and accommodate 6-7 bachelor teachers. Married teachers occupy one (1) room with kitchen.
- e) P'anmun-gun Internal Affairs Station: Located at BT 89500105 and newly built in 1953, the station includes four (4) temporary-built structures, same in size, which is a one (1)-story, grass roof, clay wall, approximately eight (8) meters long, three (3) meters wide, and two (2) meters high. The station employs approximately 30 policemen.
- f) P'anmun-gun Book-Store: Located at BT 89500102 and newly built in 1956, the store is a one (1)-story structure, gray slate roof, lime-plastered wall, approximately eight (8) meters long, seven (7) meters wide, and three (3) meters high. Approximately two (2) employees are working. The store sells various books ranging from scientific books to political books.
- g) P'anmun-gun People's Hospital: Located at BT 89550190 and newly built in 1956, the hospital is a one (1)-story structure, gray roof, lime-plastered wall, approximately 50 meters long, five (5) meters wide, and four (4) meters high. The hospital employs 10 hospital personnel, including doctors.
- h) P'anmun-gun Labor Party Committee: Located at BT 898011, the committee utilizes a civilian house which has not been destroyed during the War and which is a one (1)-story structure, grass roof, clay wall, approximately ten (1) meters long, four (4) meters wide, and 2.5 meters high.
